**Dehradun**

## **ACO LAB**

**NAME- YADRISHI DIXIT**

**BRANCH- COMPUTER SCIENCE ENGINEERING**

**BATCH- B-4 DEVOPS**

**SAP ID- 500097959**

**ROLL NO- R2142211468**

**SUBMITTED TO- Dr. Hitesh Kumar Sharma**

# **EXPERIMENT -6**

## **AIM : Working with Docker Compose File to Control Multiple Containers**

### **Steps to Complete:**

#### **1. Creating compose files**

- Create a directory named nginx in your root.

**“ mkdir nginx ”**

```
91983@DELL MINGW64 ~/OneDrive/Desktop/SEM5/ACO-LAB-2021-25(Loc
$ mkdir nginx
```

- Switch to that directory and create a file named docker-compose.yml

**“ cd nginx ”**

```
91983@DELL MINGW64 ~/OneDrive/Desktop/SEM5/ACO-LAB-2021-25(Loc
$ cd ./nginx
```

**“ vi docker-compose.yml ”**

```
91983@DELL MINGW64 ~/OneDrive/Desktop/SEM5/ACO-LAB-2021-25(Loc
$ vi docker-compose.yml
```

```

91983@DELL MINGW64 ~/OneDrive/Desktop/SEM5/ACO-LAB-2021-25
version: '2'
services:
  databases:
    image: mysql
    ports:
      - "3307:3306"
    env_file:
      - evs.env
  web:
    image: nginx
    ports:
      - "80:80"
    depends_on:
      - databases

```

- Use docker-compose "version 2" to create docker-compose.yaml file.
- Create a service named "databases". Use image named "mysql"
- Map container 3306 port to host machine 3307 port.
- Add environment variables named "MYSQL\_ROOT\_PASSWORD", "MYSQL\_DATABASE", "MYSQL\_USER" and "MYSQL\_PASSWORD" along with corresponding values for all.

“ cat evs.env ”

```

91983@DELL MINGW64 ~/OneDrive/Desktop/SEM5/ACO-LAB-2021-25(Local)/my-web-app/nginx (main)
$ cat evs.env
MYSQL_ROOT_PASSWORD = s
MYSQL_DATABASE: mysqlpdb
MYSQL_USER: root
MYSQL_PASSWORD: abc123

```

- Add another service named "web"
- Use image "nginx"

```

nginx > docker-compose.yml
1  version: '2'
2  services:
3    databases:
4      image: mysql
5      ports:
6        - "3307:3306"
7      env_file:
8        - evs.env
9    web:
10     image: nginx
11     ports:
12       - "80:80"
13     depends_on:
14       - databases

```

## 2. Running images using docker-compose

- Save docker-compose.yaml file and do “ docker-compose up ” .

“ docker-compose up -d ”

```

91983@DELL MINGW64 ~/OneDrive/Desktop/SEMS/ACO-LAB-2021-25(local)/my-web-app/nginx (main)
$ docker-compose up -d
[+] Running 11/11
✓ databases 10 layers [#####] 00/00 Pulled 130.1s
✓ 8e0176adc18c Pull complete 50.0s
✓ 2d2c52718f65 Pull complete 2.7s
✓ d88d03ce139b Pull complete 3.3s
✓ 4a7d7f11aa1e Pull complete 57.3s
✓ ce5949193e4c Pull complete 9.1s
✓ f7f024dfb329 Pull complete 10.3s
✓ 5fc3c840facc Pull complete 78.0s
✓ 509068e49488 Pull complete 13.2s
✓ cbc847bab598 Pull complete 91.5s
✓ 942bef62a146 Pull complete 53.4s
[+] Building 0.0s (0/0) docker:default
[+] Running 3/3
✓ Network nginx_default Created 0.4s
✓ Container nginx-databases-1 Started 0.7s
✓ Container nginx-web-1 Started 0.3s

```

- Verify nginx service is up and is accessible on machine.

“ curl localhost:80 ”

```

91983@DELL MINGW64 ~/OneDrive/Desktop/SEM5/ACO-LAB-2021-25(Local)/my-web-app/nginx (main)
$ curl localhost:80
<!DOCTYPE html>
<html>
<head>
<title>Welcome to nginx!</title>
<style>
html { color-scheme: light dark; }
body { width: 35em; margin: 0 auto;
font-family: Tahoma, Verdana, Arial, sans-serif; }
</style>
</head>
<body>
<h1>Welcome to nginx!</h1>
<p>If you see this page, the nginx web server is successfully installed and
working. Further configuration is required.</p>

<p>For online documentation and support please refer to
<a href="http://nginx.org/">nginx.org</a>.<br/>
Commercial support is available at
<a href="http://nginx.com/">nginx.com</a>.</p>

<p><em>Thank you for using nginx.</em></p>
</body>
</html>

```

- Stop and remove your docker container using docker-compose.

“ docker-compose down ”

```

91983@DELL MINGW64 ~/OneDrive/Desktop/SEM5/ACO-LAB-2021-25(Local)/my-web-app/nginx (main)
$ docker-compose down
[+] Running 3/3
✓ Container nginx-web-1          Removed
✓ Container nginx-databases-1    Removed
✓ Network nginx_default          Removed

```

```

91983@DELL MINGW64 ~/OneDrive/Desktop/SEM5/ACO-LAB-2021-25(Local)/my-web-app/nginx (main)
$ curl localhost:80
curl: (7) Failed to connect to localhost port 80 after 2248 ms: Connection refused

```
